FOR IMMEDIATE RELEASE

REINSURANCE GROUP OF AMERICA REPORTS SECOND-QUARTER RESULTS

ST. LOUIS, July 23, 2007 - Reinsurance Group of America, Incorporated (NYSE:RGA), a leading global provider of life reinsurance, reported net income for the second quarter of \$77.5 million, or \$1.20 per diluted share, compared to \$63.6 million, or \$1.01 per diluted share, in the prior-year quarter. RGA uses a non-GAAP financial measure called operating income as a basis for analyzing financial results. The definition of operating income and reconciliations to GAAP net income are provided in the following tables. Operating income increased 22 percent to \$84.6 million, or \$1.31 per diluted share, from \$69.1 million, or \$1.10 per diluted share in the year-ago quarter. On a per share basis, operating income increased 19 percent. Second-quarter net premiums rose 12 percent, to \$1,207.6 million, from \$1,076.6 million a year ago. Net investment income totaled \$274.9 million versus \$168.6 million the year before.

For the first half of 2007, net income totaled \$153.7 million or \$2.39 per diluted share, compared to \$132.7 million, or \$2.12 per diluted share, in the year-ago period. Operating income totaled \$166.7 million, or \$2.60 per diluted share, compared to \$137.5 million, or \$2.19 per diluted share in the prior-year period, a 19 percent increase on a per share basis. Consolidated premiums were up 13 percent, to \$2,333.1 million from \$2,069.0 million.

A. Greig Woodring, president and chief executive officer, commented, "We reported solid results, with notably strong results in Canada and Asia Pacific more than offsetting somewhat higher claim levels in the UK. The U.S. segment reported pre-tax net income totaling \$86.2 million for the quarter versus \$70.9 million the year before. Pre-tax operating income increased 19 percent to \$93.3 million from \$78.5 million the year before. Net premiums were up 9 percent to \$720.4 million from \$663.9 million in the prior-year quarter.

"Our Canada operations reported a strong quarter with pre-tax net income of \$24.2 million compared to \$11.1 million a year ago. Pre-tax operating income totaled \$22.6 million, up substantially from \$8.9 million a year ago, when claims were higher-than-expected. Mortality experience during the current quarter was favorable. Net premiums increased 26 percent to \$122.6 million from \$97.1 million in the prior year. On a year-to-date basis, premiums are up 16 percent. Net premiums for the second quarter of 2007 were favorably affected by currency exchange rates relative to the prior year by approximately \$2.7 million, as the Canadian dollar strengthened slightly. The impact of foreign currency fluctuations on operating income was not significant.

"Asia Pacific reported pre-tax net income of \$15.6 million compared with \$7.7 million in the year-ago quarter. Pre-tax operating income totaled \$16.1 million compared with \$7.8 million a year ago. Segment-wide claims experience was slightly favorable, while the year-ago quarter reflected poor mortality in our South Korean operations. Net premium flow was good, increasing 18 percent to \$199.0 million from \$168.9 million. Foreign currency fluctuations favorably affected net premiums by approximately \$8.5 million, primarily due to the strength of the Australian dollar. The impact of foreign currency fluctuations on operating income was not significant.

"Europe and South Africa results were off slightly due primarily to high claim levels in the UK, with pre-tax net income of \$11.8 million compared to \$17.3 million a year ago. Pre-tax operating income totaled \$12.5 million versus \$17.4 million last year, a period in which we experienced favorable mortality. Net premiums increased 13 percent to \$164.8 million. Foreign currency exchange fluctuations favorably affected reported net premiums by approximately \$10.0 million due to relatively strong British pound and euro currencies. The impact of foreign currency fluctuations on operating income was not significant."

Woodring concluded, "We are pleased with the results for the quarter and the first half of the year. Each of our operations has good momentum going into the second half of the year. We continue to see substantial growth opportunities internationally, both near-term and longer-term, and have recently established representative offices in Germany, France and Poland as we look to expand our European presence. We believe we are well-positioned to take advantage of opportunities across the globe in all the key life insurance markets."

The company also announced that its board of directors declared a regular quarterly dividend of \$0.09, payable August 24 to shareholders of record as of August 3.

A conference call to discuss the company's second-quarter results will begin at 9 a.m. Eastern Time on Tuesday, July 24. Operating Income

RGA uses a non-GAAP financial measure called operating income as a basis for analyzing financial results. This measure also serves as a basis for establishing target levels and awards under RGA's management incentive programs. Management believes that operating income, on a pre-tax and after-tax basis, better measures the ongoing profitability and underlying trends of the company's continuing operations, primarily because that measure excludes the effect of net investment related gains and losses, as well as changes in the fair value of embedded derivatives and related deferred acquisition costs. These items tend to be highly variable, primarily due to the credit market and interest rate environment and are not necessarily indicative of the performance of the company's underlying businesses. Additionally, operating income excludes any net gain or loss from discontinued operations and the cumulative effect of any accounting changes, which management believes are not indicative of the company's ongoing operations. The definition of operating income can vary by company and is not considered a substitute for GAAP net income.
